

# BOONE COUNTY PLANNING COMMISSION

GIS Services Division

## **Document Hyperlinking**

Project Summary – 01/20/10

The Document hyperlinking project has been on-going in Boone County since early 2004. After several revisions of the “Proof of Concept” were completed, a final solution was implemented in the spring of 2008. Since 2004, however, the primary goal of this project has remained intact:

***To provide its member agencies with access to important documents through a standard GIS application***

The three major components of this project include: 1) the hyperlinked documents, ranging from digital photos to Sara Title III EHS Plans, 2) the standard GIS application (known as BooneMap LT), used to access multiple documents using HTML, and 3) an Access database, used to tie everything together and act as the hyperlink repository for both creation and organization.

In the following sections, the three major components will be discussed in greater detail.

**This is a working document and will be updated periodically.**
